

Ryan McBride

Software Engineer

Denver, CO ♦ (720) 751-0691 ♦ mr.ryan444@gmail.com ♦ [LinkedIn](#) ♦ [GitHub](#) ♦ rmcbride.dev

Summary

Product-focused Full-Stack Software Engineer building reliable user-facing applications with React and TypeScript. Led greenfield products from architecture through delivery, partnering closely with product and design, and using agentic development workflows to accelerate high-quality software delivery.

Skills

Frontend: TypeScript, JavaScript, React, Remix, Vue.js, HTML, CSS, Tailwind CSS, React Query

Backend & Data: Node.js, GraphQL, PostgreSQL, Redis, Kafka, Prisma, SQL

Testing: Cypress, Jest, Vitest, Mocha, Chai, Test-Driven Development

Tools & Practices: Git, API Integration, Agile

Agentic Development: Kiro, Claude Code, Codex, Spec Kit

Experience

Software Engineer, Charter Communications – Greenwood Village, CO September 2022 – Present

- Led full-stack development of a greenfield platform from architecture through testing and delivery, completing work originally scoped for five engineers with a two-engineer team ahead of schedule and under budget
- Implemented agentic development workflows across two revenue-impacting projects, configuring custom agents, project-specific guidance, and documentation to standardize and accelerate delivery for a 12-person team
- Developed an ROI analysis workflow that reduced sales-to-engineering turnaround time from weeks to minutes
- Served as technical lead for Spectrum On Demand, guiding architecture and integrating Apple TV+, Xumo, and Peacock into a customer-facing platform supporting 1M+ monthly visitors
- Built a bidirectional Salesforce integration that enabled real-time updates and maintained consistent customer data across platforms
- Built and delivered a Kafka producer on an accelerated timeline, enabling downstream processing of data from sold projects without delaying the release
- Supported production releases and resolved time-sensitive deployment incidents by diagnosing service outages and server-side build failures, coordinating across teams, and implementing fixes within scheduled maintenance windows

Frontend Software Engineering Intern, Vizio – Denver, CO June 2022 – August 2022

- Built customer-facing Vue.js features and partnered with backend engineers to integrate APIs and deliver cohesive user experiences

Vocational Program Manager, SustainAbility Recycling – Denver, CO August 2015 – September 2021

- Managed and mentored a team of 20 adults with developmental disabilities, strengthening leadership, communication, and problem-solving skills
- Oversaw operations for electronics recycling, facility performance, and laptop refurbishment programs

Education

Certificate of Completion in Frontend Engineering April 2022

Turing School of Software and Design – Denver, CO

Bachelor of Science in Engineering Technology

Texas State University – San Marcos, TX

magna cum laude
